

# Changes since last consultation – Revised Landscape Plans

Revisions have been made to the proposed landscaping works to take into account comments received through previous consultation.

The revisions move the southern hedgerow (and in turn the internal access road) a few metres to the north. This enables it to screen the site from Core Path 207, whilst not physically encroaching on it or giving a sense of enclosure. Thus, maintaining views to the wider landscape to the south, out and over the substation.

An emergency access has been incorporated (NW corner).
